MADD Nebraska Court Monitoring Briefing 2012

Introduction

Sates can have strong laws and tough enforcement but without consistent outcomes in the court system the message that drunk driving is a serious crime may get lost. The court system is our society's mechanism for determining an individual's guilt of innocence. It also sets the parameters of an offender's punishment, restitution and rehabilitation.

A Look at Drunk Driving in Nebraska

Impaired driving is the most frequently committed violent crime in Nebraska. In 2011 there were 12,034 DUI (Driving Under the Influence) arrests and 10,549 DUI convictions in Nebraska. This translates to 33 arrests and 29 convictions daily for DUI. On Nebraska roadways, 51 (28%) of the 181 fatal motor vehicle crashes were alcohol related. This means that one person died every seven days on Nebraska roads as a result of drunk driving. Alcohol was known to be involved in 49 (30%) of the 164 fatal crashes that occurred in Nebraska in 2011. This is an overall increase from 2010 when 46 (28%) of the 166 crashes involved alcohol. Driving Under the Influence arrests decreased from 12,399 in 2010 to 12,034 in 2011 statewide. Driving Under the Influence Conviction rates increased slightly from 86% in 2010 to 88% in 2011 statewide. It is clear that MADD and Highway Safety Advocates can do more to maintain and lower the number of alcohol-related motor vehicle crashes on our roadways.

The Case for Court Monitoring

Research has shown that first-time DUI offenders have driven drunk an average of 87 times before they are arrested (Zader, Krawchuk, Moore, 1997). The primary reason drivers continue to drive drunk is because they can. Nationally, about one-third of all drivers arrested for DUI have had a previous drunk driving conviction, which is similar to Nebraska's rate. Across the country, DUI cases are often handled inconsistently, amended to a lesser charge, or simply dismissed by the justice system. MADD Nebraska advocates for swift and equitable treatment for all DUI cases.

MADD's Court Monitoring Program was designed to ensure that DUI arrests are prosecuted, unwarranted dismissals are decreased and justice is achieved. Goals of the CMP are to:

- Compile pertinent information on how DUI court cases are handled from county to county.
- Share mutual concerns about the outcomes of criminal cases with professionals in the legal arena.
- Report information gathered by trained volunteers to relevant entities and community members to ensure the system can be maintained and improved.

To achieve these goals, MADD Nebraska utilized trained volunteers to observe court procedures and collect pertinent information in DUI cases. Types of data collected included offense type, age and gender of the offender and sanctions imposed. MADD also worked closely with law enforcement, prosecutors and vested partners to relay data collected from the court monitoring program to show trends, patterns and behaviors when it comes to drunk driving enforcement and prosecution in those counties.

County Selection

The MADD Nebraska Court Monitoring Program was active in twenty-one counties; Adams, Buffalo, Cass, Dakota, Dawson, Dodge, Douglas, Gage, Hall, Holt, Lancaster, Lincoln, Madison, Otoe, Platte, Sarpy, Saunders, Scotts Bluff, Seward, Washington and York. Funds were provided from the Nebraska Office of Highway Safety. The 21 prioritized counties included both Rural and Urban areas ranging from 10,435 – 517,100 residents per county.

This main goal of this report is to document the trends and patterns as observed in the adjudication of DUI cases in each county. This report will also determine if DUI sanctions are consistent across the eight counties.

Quantitative Data Collection

Court Monitoring Program data were obtained from two sources: court trial forms, completed by MADD Nebraska staff and volunteers, and the Nebraska Trial Courts Case Search System database, hereafter called Justice. CMP volunteers included concerned community members, college students interested in volunteering and/or requiring internship hours for a class, and retired adults. Data from the court trial forms were collected from four categories: 1) case information, 2) charges, 3) sanctions/sentence and 4) comments. Examples of case information included defendant name, date of birth and name and location of court. Charges recorded included the original charge, final charge, amended, and arresting agency. Examples of

sanctions/sentences imposed included jail time, fines, ignition interlock, license suspension/revocation, and probation.

Information collected by court program monitors were verified by MADD Nebraska CMP staff through records accessed from Justice. This database provided a detailed record of each DUI case presented to the court. Case information, charges, and sanctions imposed were available through the Justice system. Data obtained from the Justice database was compared to information recorded on the court trial form to assure accuracy of data collection by court program monitors.

Case files with offense dates ranging from January 1st, 2011 – December 31st, 2011 were utilized for the data collection.

As close to one hundred percent of all cases were included in the analysis if a county had 300 or fewer DUI arrests in the year of interest for analysis. If a county had more than 300 DUI arrests (i.e., Hall County) a random number of cases, for a total of 300, were chosen for analysis for expedited data analysis.

Data Analysis

Data from closed and misdemeanor DUI cases with sanctions imposed were entered into Microsoft Excel spreadsheets for analysis. Variables of interest for this report included rulings, number and type of amended cases, length of case, offender age and gender, offense type, and sanctions imposed. Data were reported by frequencies, percentages, and averages. Qualitative data from interviews and surveys were analyzed using thematic analysis.

County Demographics 2011:

The table below shows a comprehensive count for all twenty-one counties, including gender and age breakdowns. Total counts and the overall average age are also included. Male DUI offender comprised 77% while the females comprised 23% of all DUI offenders from the analyzed cases. The number of female offenders is down from the 28% of female offenders in the 2010 data that was analyzed. The average age of DUI offender increased from 33 years old in 2010 to 34 years old in 2011.

DUI Conviction Rates 2011:

The average conviction rate for all twenty-one counties was 85%. Dakota County and Dodge County had the highest conviction rate at 97% and Sarpy County had the lowest rate at 57%. Sarpy County's low conviction rate may be due to their DUI Diversion Program. A large majority of the "Dismissed" cases were sent through the diversion program therefore showing up in Justice as "dismissed." Data included for the conviction rates were from Justice only, and open, dismissed, bench warrant, guilty pleas to non-DUI charges and cases transferred to Juvenile court were excluded from analysis to capture sanctioning practices of adjudicated DUI cases only.

Sanctions Imposed

Thirteen sanctions imposed for DUI offenders for each county were recorded. The sanctions included: Fines, Jail, Probation, Revoked License, Impound License, Interlock, Victim Impact Panel, Attitudinal Dynamics, AA, Alcohol Education, Community Service, House Arrest and Immobilize Vehicle. The following data regarding sanctions imposed in each county were based on data from the Justice system only. Consequently, some of the data presented, or lack thereof, may not be a complete representation of the sanction practices in each county. There may be additional sanctions included in probation orders and MADD is not able to access those records.

All twenty-two counties utilized Fines, Jail, Probation and Revoked/Impound License as a sanction for DUI offenders. Depending on the DUI offense, fines range from \$400 - \$1,000, probation ranged from 6-12 months (up to 5 years for DUI 3rd), and revoked/impounded license ranged from 60 days to 15 years for DUI 3rd.15+ cases. An interesting note, Hall County used Probation to the Court for DUI 1st – DUI 2nd offenders more than any other county.

Victim Impact Panel, Attitudinal Dynamics, AA, Alcohol Education, Community Service, were all sanctions used by Adams, Buffalo, Cass, Dodge, Douglas, Hall, Lancaster, Otoe, Platte, Sarpy, Saunders, Scotts Bluff, Seward, Washington and York counties.

House Arrest was utilized by Lancaster, Platte and Scotts Bluff counties. Immobilize Vehicle was used by only Cass, Hall, Platte and Sarpy counties from the analyzed cases.

Box Butte, Dawson, Custer, Gage, Lincoln, Madison and Saline counties primarily sanctioned Ignition Interlock with one or two other above mentioned sanctions, such as AA or Alcohol Education in addition to Fines, Jail and License Revocation.

The following County Overviews break down each county, showing Demographics, Age Range, Case Information, Adjudication and Amended Case Summaries. DUI type and sanctions are also included for each county.

Cases found guilty: 0

Summary:

Male DUI offenders comprised 77% while the females comprised 23% of all DUI offenders from the analyzed cases. The number of female offenders is down from the 28% of female offenders in the 2010 data that was analyzed. The average age of DUI offender increased from 33 years old in 2010 to 34 years old in 2011.

The average conviction rate for the 2011 data for all twenty-one counties was 85%, the same as with the 2010 data. Dakota County and Dodge County had the highest conviction rate at 97% and Sarpy County had the lowest rate at 57%. Sarpy County's low conviction rate may be due to their DUI Diversion Program. A large majority of the "Dismissed" cases were sent through the diversion program therefore showing up in Justice as "dismissed." This data is again the same as in the 2010 data.

The average time it took for a DUI case to be adjudicated, from arrest to conviction, for the twenty-one counties was 150 days. The range ran from 99 days in Dakota County to 240 days in Adams County.

The total percentage of amended cases for the 2011 data for all twenty-one counties was 35% - the same as in 2010. The proportion of total amended cases ranged from less than 1% (Gage and Lancaster) to 67% in Douglas County.

Conclusion

Overall, Nebraska has some of the strongest DUI laws in the nation. While inconsistencies in the types of sanctions exist, overall offenders are being taken off the streets. Numerous factors impact how law enforcement, prosecutors and judges adjudicate DUI cases. These may include city ordinances, state and federal laws, technical issues with breath testing equipment and circumstances of each individual case.

Currently, there are many strong statutes and laws in place for the adjudication of DUI cases. One concern from this report is the number of cases being amended to lesser charges. An offender who is arrested for a DUI 2nd should not be allowed to plead down to a lesser charge – the offender needs to be held accountable. Another concern is the high rate of offenders taking House Arrest in Lancaster County. Offenders that take a straight sentence, for example, a DUI 1st requesting a fine and jail time is not going to receive any type of treatment and may in turn become a repeat offender.

Observations generated from this report include:

- Fines, jail probation and license revocation were enforced consistently in all counties.
- House arrest was used primarily by Lancaster County in over half of the DUI 1st, DUI 1st .15+, DUI 2nd and DUI 2nd .15+ cases.
- Ignition Interlock was sanctioned but there is no way for MADD to know if the offenders had the device installed in their car or for how long.
- The number of amended cases is an issue in some of the counties.

MADD will continue to analyze DUI cases and sanctions and build on this database. Volunteers will continue to be trained to attend court, and staff will keep talking with community partners and strengthening relationships. Education is a vital component of the Court Monitoring program.
